PROFESSIONAL EXPERIENCE

Ridgeline Apps, Product Engineer II, Custodian Data Team, Market Data Connectivity Team July 2024 – Present

- Pioneered one of the company's first agentic workflows, a Claude sub-agent that cuts Direct Connections implementation from **4 weeks to 2–3 days**, powering **6 customer integrations** to date; automated the full integration lifecycle, replacing manual config edits with validated PR workflows; recognized with the company's annual Innovation Award
- Designed and shipped a full-stack self-serve admin UI (React + Kotlin) that shifted customer data configuration from developers to Customer Success, saving **5+ hours/week** in engineering time
- Modernized core data-grid UI components by independently owning the full migration (roadmap, architecture, scripts, and production validation), improving reliability and maintainability across **6 critical customer-facing tables**

Ridgeline Apps, Product Engineering Intern June 2023 – August 2023

- Engineered an audio alert system for Ridgeline's trading platform, improving user experience during trade executions, handling tens of millions of dollars weekly; developed 4 APIs on a team of 2 using **Typescript, React, AWS, & Python**.

Paramount+, Paramount Global, Software Engineering Intern, Roku Developer Intern June 2022 – November 2022

- Integrated a new channel, My5, to Roku platform and made improvements to Roku Ad-Video team, working with channels including Nick, Nick Jr., and Smithsonian; **Bright Script**
- Collaborated with 6 developers on the Kids Web Team, improving the interactivity of Nick & Nick Jr.; aided in implementation of new search feature; **Javascript, React, NodeJS, and Storybook**

Rutgers Peer Learning Program, Computer Science Learning Assistant September 2021 – May 2024

- Led **80+ students** in 3 weekly recitations on **Java**, recursion, and OOP, providing hands-on guidance and instruction to promote student understanding and success

SKILLS

Languages: Kotlin, Typescript, Python, JavaScript, Java, C; **Frameworks:** React, Node.js, Spring, Ktor, Prisma; **Cloud/Infra:** AWS (S3, IAM, Lambda, Secrets Manager, RDS/Postgres), SFTP, Firebase, Supabase, Vercel, Docker, Datadog, CloudWatch; **Tools:** Github, REST APIs, JSON/XML/CSV parsing, Cypress, Jest, Claude API, Open AI API

EDUCATION

Rutgers University New-Brunswick, Honors College September 2020 – May 2024

Bachelor of Science in Computer Science, Minor in Cognitive Science

Cumulative GPA: 3.73/4.0; Magna Cum Laude; Honors: Cap & Skull Senior Honor Society, Undergraduate Research Writing Conference Recipient; Relevant Coursework: Data Structures, Discrete Structures, Software Methodology, Computer Architecture, Internet Technology, Databases, Intro to AI, Computer Algorithms, Intro to Data Science

PROJECTS

Faro March 2026

- Built an AI-powered travel planning app (React Native, TypeScript) integrating Claude, Amadeus, Supabase, Shotstack, ElevenLabs via Node.js backend, delivering a fully functional product with 7+ live third-party integrations.

CliMit September 2021 – May 2024

- Co-founded a 35-person GIS/ML startup optimizing disaster-response strategy, later expanded into a 30-member climate-tech fellowship; **ArcGIS, Python, Javascript**

PokePrice March 2026

- Ideated and built PokePrice, a real-time Pokémon card pricing app, using React Native, Node.js, & a hybrid CV/OCR identification pipeline integrated with eBay & TCGplayer APIs, delivering sub-2-second scan-to-price results with bulk scanning support for 100+ cards.

LEADERSHIP EXPERIENCE

Ridgeline, Engineering Show and Tell Host, Reno Office Fun Squad February 2025–Present

- Drive company-wide technical knowledge sharing as host of Ridgeline's bi-monthly Engineering Show & Tell, reaching 30% of employees per session; rebuilt the program philosophy around cross-team alignment and accelerated AI adoption
- Reno Office Fun Squad member; founded Ridgeline's company-wide cookie exchange and led the first two annual events, scaling participation across all offices

Road to Silicon Valley Program, President, previous Vice President of Recruitment December 2020 – May 2024

- Managed selective entrepreneurial org. of 100 students, spearheading over 20 career opportunities including alumni fireside chats, speaker series, and panel events; co-created a fellowship with 30+ students to back student-led startups
- Headed recruitment of 100+ applicants for the 4th and 5th Cohort with strategic marketing & selective interview process

Students for Environmental Awareness, President, prev. VP & Digital Manager September 2020 – May 2024

- Led weekly meetings of 50+ students, manage 5 club campaigns, increasing membership by 45% since 2020
- Pioneered a food waste campaign, reaching 80+ businesses and students through the Too Good To Go app
